

CARBON REDUCTION PLAN

Multitone Electronics plc Multitone House, Shortwood Copse Lane, Kempshott, Basingstoke, RG23 7NL, UK	
Publication Date	October 2025
Revision	1.0

Commitment to Achieving Net Zero

Multitone Electronics plc is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year	2022
Additional Details relating to Baseline Emissions calculations	
The following details Multitone Electronics plc's initial baseline measurements, no previous scope 1, 2 or 3 emissions have been recorded. Calculations and statements are made in line with our financial year; which runs from July to June, i.e., a reporting year of 2023 represents the 12 months up to and including June 2024.	
Baseline Year Emissions	
Emissions	TOTAL (tCO₂e)
Scope 1	100
Scope 2	59
Scope 3 • upstream transportation and distribution • waste generated in operations • business travel • employee commuting • downstream transportation and distribution	233
Total Emissions	392

Current Emissions Reporting

Reporting Year	2024
Emissions	TOTAL (tCO₂e)
Scope 1	54
Scope 2	46
Scope 3	156
Total Emissions	256

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.		
1. All leased company vehicles to become full EV, at the next change under lease contract.		
2. Selection, on provision of reliable data, and use of upstream distribution and downstream delivery providers that utilise more energy efficient methods and technologies.		
We project that carbon emissions will:		
decrease over the next	Five Years	
to:	236	tCO ₂ e
this is a reduction of:	40	%

Graphical Progress

(Please note that this is an estimated progress and will not be linear)

Carbon Reduction - Actual vs Target (Projected) (tCO₂e)

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline.

- All new company vehicles have to be fully electric- this is now the purchasing/lease requirements for all new vehicles coming onto the fleet while we phase out the older models.
- PIR motion sensor lighting in the canteen to reduce lighting wastage.
- Boilers within the main factory building are turned off during the summer months to save on gas emissions.

The carbon emission reduction achieved by these schemes equate to:

11

tCO₂e

Reduction against the baseline (and the measures will be in effect when performing the contract)

2.8

%ge

Completed Carbon Reduction Projects (Information only)

- Water Savers in all cisterns from April 2025 to cut down on water usage.

In the future we hope to implement further measures such as (Information only):

- Replacement of legacy heating/cooling systems with more energy efficient alternatives.
- Replacing the whole fleet into EV as mentioned earlier.
- Research into efficiency of buildings.

Declaration

This Carbon Reduction Plan has been completed in accordance with PPN06/21 and the associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the senior management of Multitone Electronics plc
